Employment History

- Eaze, Fulfillment October 2021 - Current
Staff Engineer Remote
- DoubleVerify, Social Integrations July 2020 - October 2021
Staff Data Engineer New York NY
- Led project planning, design and development of a greenfield hybrid streaming/batch pipeline for managing allow lists for Facebook videos, shipping an MVP in only 7 weeks and scaling to tens of millions of entries
 - Developed an internal data engineering framework with a focus on first-class PyCharm support, confidence in correct code and rapid-paced development
 - Owned the Engineering Bi-Weekly meeting, where engineers shared department-wide updates and gave presentations on a bi-weekly basis
 - Mentored and trained other engineers on the team through pair programming, documentation and videos
- Squarespace Inc, Finance Products July 2019 - January 2020
Senior Software Engineer New York NY
- Supported and maintained financial data pipelines used for ASC606 revenue recognition, cash and tax reporting and financial planning for a multi billion dollar web site host
 - Spearheaded proposals to onboard billing and payments data onto a data vault reference architecture to improve velocity and decrease bugs, and to rearchitect reporting to mirror industry standard BI tools
 - Designed and instituted an on-call process to ensure that support work was spread evenly
- Gizmodo Media Group, Data Engineering September 2016 - May 2019
Senior Developer New York NY
- Acted as the technical lead to deliver Amazon affiliate program commerce analytics involving three teams and multiple contractors, providing experiment data used to optimize conversions on a front page redesign
 - Architected an A/B testing API so experiments could be configured with a web UI instead of disparate scripts
 - Owned internal analytics and recommendation systems that served over 100 million users a month; overhauled legacy systems and implemented monitoring, vastly decreasing total outages and virtually eliminating undetected outages
 - Designed, built and maintained ETL jobs for a rapidly-growing data warehouse using Python, AWS RedShift and Looker
 - Ported the organization's microservice framework from Scala and Play to Python and Flask to enable development of services by the data team
 - Mentored junior employees on the team
- Condé Nast, Copilot API February 2014 - August 2016
Software Developer New York NY
- Wrote HATEOAS-inspired graph-capable content relationships API that supported the data modeling needs of over a dozen brands using Condé Nast's all-new internal CMS
 - Worked on the team that launched Vogue Runway's real time fashion show coverage during New York Fashion Week, including leading a data migration that replatformed over a decade of content

i.TV LLC
Software Engineer

August 2013 – November 2013
Provo UT
